## A step above... in Quality, Selection, and Design

### **Quality**

All our products are manufactured from the highest quality materials and undergo meticulous examination to ensure only the best products reach your door. We believe strongly in the quality, integrity, and reliability of our products and offer a lifetime warranty on all Jeffrey Alexander decorative hardware (see page 208).

### **Selection**

Jeffrey Alexander offers 60+ patented and original collections plus a variety of industry-standard designs in a wide range of styles and finishes. With extended lengths as well as appliance handles available in many of our collections, there's something for everyone.

### **Design**

Inspiration comes from the latest styles in interior design to the newest fashion trends on the runway. That inspiration is creatively transformed into beautiful hardware for any kitchen, bath, or home project. Our designs are heavier in weight with solid or flat backs, not hollow backs, adding a touch of luxury while providing a comfortable feel in your hand.

## DRAMATIC

Katharine brings a bit of dramatic glamour to any home. Harkening days of Old Hollywood, this alluring and curvaceous square knob sits atop stacked square feet. The soft square is echoed in the coordinating pull and is combined with a slightly higher hand clearance, making it a great option for aging in place. Choose from four classic finishes to complete any traditional or transitional space.

## SUBTLE

A subtle reflection of a warded lock key, Knox pairs leading lines and intentional curves for a simple yet distinctive look. This closed-ended bar pull series offers a generous 1" hand clearance for an aesthetically pleasing option for aging in place and ADA projects.

### *Design Idea*

When choosing hardware, think about how often the drawers or doors are used, as well as who the user is. Longer pulls and pulls with a larger hand clearance are easier to grab, especially for users with limited hand mobility.

All brushed, antique, and distressed finishes are created by hand to add texture to the item. We hold a tight range of acceptance for color variation, however, a slight variance in the texture and tone of these items can occur. We consider these variances to be minimal; slight variations are normal.

For best results, use water and a mild soap with a soft cloth. Avoid glass cleaners, general kitchen/bathroom cleaners and other abrasive cleansers, as those cleaners could damage the finish.

### ***Soap & Water Method:***

1. Fill a bowl or sink with warm water and add a squirt of dishwashing liquid or olive-based soap. Swish the water around with your hand to make suds.
2. Dip a rag into the soapy water and wring it out.
3. Wipe the cabinet hardware with the soapy rag. For tough grime, dip a soft toothbrush into the soapy water and scrub gently.
4. Rinse the rag, wring it out, and wipe the cabinet hardware to remove the soap residue.
5. Buff the hardware with a dry chamois cloth to polish and shine it.

### ***Vinegar Method***

1. For tougher cleaning, use a solution of one part white vinegar to one part water.
2. Moisten a rag with the vinegar solution.
3. Wipe the hardware with the rag. If the rag becomes dirty, rinse the rag with water and remoisten with the vinegar solution.
4. Buff the hardware with a dry chamois cloth for a nice polish and sheen.

To reduce damage to both cabinets and hardware, use a screwdriver to hand tighten the screws to a knob or pull. Do not use a power drill or impact driver. The use of a power drill/impact driver can easily strip screw heads and overtighten hardware, causing damage to the cabinet door or drawer front.
